

AUTISM AWARENESS

Overview

This course is designed for those with no prior knowledge of Autism and is therefore suitable for anyone with an interest in the subject, although it is especially recommended for all new health care sector employees. Autism covers a wide range of social, speech and communication disabilities, and delegates will learn how to manage any variation whilst remaining understanding of the behavioural difficulties which it can cause. The training fulfils recommendations underlined by the CQC to help improve the quality of care provided to those with autism.

Outline of Programme

- Introduction to Autism.
- Causes, symptoms and diagnosis.
- Autism Triad of Impairments.
- Dealing with difficult behaviour.
- Understanding and working with Autistic individuals.
- Autism Spectrum Disorder (ASD) including Asperger's syndrome.
- Differentiate between Autism and Asperger's.
- Common misconceptions about Autism.
- Legal responsibilities and legislation.

Assessment

The autism awareness training course runs over 3 hours and delegates will be expected to engage in several group activities. Our experienced trainers will be on hand to help guide delegates through these sessions and a certificate will be awarded upon completion.

Cost

Our courses are competitively priced, and we aim to beat any equivalent training quote.

Important Information

- The training venue should be quiet and undisturbed.
- Staff should not be expected to be on duty.
- Staff attending should remain for the entire length of the session.
- Flexible dates available.
- Call to book a day that suits you.
